

MANAGING STRESS ON THE JOBSITE

Today, we're tackling a topic that often goes unnoticed but can seriously affect your safety and performance: managing stress. Construction work isn't just physically demanding—it's mentally tough too. And if we don't handle stress the right way, it can lead to accidents, health issues, and even problems at home.

WHY IS STRESS SUCH A BIG DEAL?

Let's face it, construction work comes with its fair share of stress: Tight deadlines, long hours, dangerous conditions weather delays, pressure to get things done fast and right the first time. All of this can pile up, and if we're not careful, it can wear us down. Stress doesn't just stay in your head—it affects your whole body. When we're stressed, we're more likely to lose focus, make mistakes, and even get injured.

HOW STRESS SHOWS UP AT WORK THE IMPACT OF STRESS ON SAFETY

- **Irritability or mood swings**—Snapping at others over small things or feeling on edge all the time.
- **Difficulty concentrating**—Forgetting details, missing steps in a process, or zoning out when someone's talking to you.
- **Fatigue**—Feeling tired even after a full night's sleep, or needing caffeine just to get through the day.
- **Physical symptoms**—Headaches, muscle tension, upset stomach, or trouble sleeping.
- **Overworking or avoiding work**—Some people respond to stress by pushing harder, while others may start calling in sick or showing up late.
- **Slower reaction times**—Stress can mess with your ability to react quickly, which is critical on a job site.
- **Poor decision-making**—Feeling overwhelmed can lead to taking shortcuts, skipping safety steps, or not thinking things through.
- **Increased accidents**—When you're distracted or exhausted, you're more likely to get hurt or cause someone else to get hurt.

PRACTICAL TIPS FOR MANAGING STRESS

We can't eliminate stress completely, but we can take steps to manage it better. Here are some strategies that can make a difference:

- **Take Breaks** - Don't skip your breaks. Use them to step away from the noise, breathe deeply, and clear your mind. Even a 5-minute pause can help reset your stress levels.
- **Practice Deep Breathing** - When you're feeling overwhelmed, take a moment to breathe. Inhale slowly for a count of four, hold for four, and exhale for four. Repeat this a few times to calm your nerves.
- **Stay Organized** - Write down your tasks for the day. Having a plan can reduce the stress of feeling like you're juggling too much. prioritize what needs to be done first, and focus on one thing at a time.
- **Focus on What You Can Control** - Construction IS full of unexpected changes, from weather delays to last-minute design tweaks. Instead of stressing over things you can't control, focus on what you can do.
- **Take Care of Your Body** - Eat regular meals—Skipping meals or eating junk food can make stress worse. Stay hydrated—Dehydration can increase stress and fatigue, Get enough sleep—Your body needs rest to recover from the day. Try to get 7-8 hours of sleep each night.
- **Know When to Ask for Help** - It's okay to admit when stress is getting the best of you. If you're feeling overwhelmed, it's better to speak up than to keep pushing through. Asking for help is a sign of strength, not weakness.
